Summary

I am an innovative and technically astute full stack developer, well-versed in analyzing user needs and developing software to precisely meet diverse needs. I have gained Seven (7) years of professional experience in software engineering using C#, Nodejs, JavaScript, TypeScript, Angular. I demonstrate mastery of multiple programming languages, libraries, frameworks and proactively keep up with industry trends by learning continually. I want to be at the heart of the business or be part of the team leading the implementation of a strategic business goal by adding or creating a productive value and simplifying complexity for stakeholders.

Experience

Software Developer

First City Monument Bank | GRA, Ikeja, Lagos
Application Developer | 08/2018 - Present

- Liaise between internal team members, OEMs, vendors, and customers for continuous solution integration, deployment and maintenance for applications deployed and used by the Compliance and Control department of the Bank.
- I served as the led Implementer writing T. SQL, performing SQL query optimization and creating SSIS packages for bulk data extraction, transformation and loading. It is a solution built using MS SSDT, T. SQL, MSSQL Management Studio. deployment and maintenance.
- I served as the led Developer handling end to end designing and developmental tasks to the point of deployment for the Bank Middleware for Enterprise Content Management Solution. It is a RESTful API that exposes the contents manipulation capability of the EDM. It is built with C# on the ASP.Net Core platform using Visual Studio 2019 as the development tool.
